Nicholas Bennett

Frontend Software Engineer

Baltimore, MD | 224-432-4264 | nicholasbennett.work@gmail.com

bigfriendlyfunction.com | github.com/nrrb | linkedin.com/in/nicholasrrbennett

SUMMARY

Software engineer building production Vue 3 applications for cybersecurity operations and customer reporting. Owns complex interfaces from architecture through release, with additional React project experience and Python/Django API development. Brings a long technical support background to understanding user workflows and resolving production problems.

CORE SKILLS

JavaScript ES6+ • Vue 3 • Composition API • Pinia • Vite • React
HTML5 • CSS3 • Responsive design • Chart.js • Tiptap • REST APIs
Playwright • Automated testing • ESLint • Git • Bitbucket • Figma
Python • Django • SQL/MySQL • Jira • Confluence

PROFESSIONAL EXPERIENCE

Software Engineer

CyberMaxx | Baltimore, MD | May 2025 - Oct 2026

- Owned frontend architecture and delivery for features across Aegis, an internal security operations platform for a company of approximately 200 employees, and CyberSight, a customer portal serving a client base of approximately 400 companies.
- Built the Elastic Rules Manager interface to bring multitenant SIEM rule management into Aegis; also owned rule management interfaces for AlienVault USM and Devo.
- Built the Sublime MDR for Email reporting dashboard in CyberSight, recreating vendor reports with responsive Chart.js visualizations and historical PDF generation and downloads in JavaScript.
- Implemented a responsive MITRE ATT&CK matrix with technique and sub-technique filtering, allowing customers to explore security cases through a familiar threat framework.
- Migrated approximately six Django web applications to compiled Vue and rebuilt the Email Campaigns application; made frontend architecture decisions and reviewed pull requests.
- Delivered approximately 125 Jira work items across web, mobile, and backend codebases; used automated tests and Playwright, incorporated stakeholder UAT feedback, and contributed to weekly production releases within an eight-person engineering team.

ADDITIONAL TECHNICAL EXPERIENCE

Senior Optimization Consultant

Strata Decision Technology | Chicago, IL | Apr 2023 - Jul 2023

- Used SQL, Microsoft Excel, and data integration and configuration to investigate customer problems and support healthcare software workflows.

Product Support Engineer

Pear Therapeutics | Chicago, IL | Oct 2021 - Nov 2022

- Triaged UI defects in a cloud-based therapy platform and wrote JavaScript reproduction scripts to help engineers investigate fixes.
- Created Jira dashboards exposing more than 4,000 issues to support sprint planning and issue visibility.

Full Stack Developer

Kellogg School of Management | Evanston, IL | Jan 2020 - Oct 2021

- Built two Vue.js and Node.js applications supporting 1,200 MBA students; implemented component-based interfaces and REST and WebSocket integrations for real-time scoring.

Senior Technical Support Specialist and Faculty Computing Support Lead

Kellogg School of Management | Evanston, IL | Jul 2015 - Jan 2020

- Supported 300 faculty across six campuses; built a Python/Django and AngularJS search portal and a Vue.js student internship matching tool.

Earlier development and IT experience

News Apps Developer, Institute for Nonprofit News (2015) and Hoy Chicago (2014-2015): WordPress migrations, custom themes and plugins, PHP, and SQL. Junior Python Developer, WiredTree Hosting (2013-2014): Django internal tools and legacy PHP migration. Research Technologist, Northwestern SONIC Lab (2011-2012): Python, SQL, and bash for social network research. Additional IT support roles at Northwestern/Kellogg and BarcodesInc, 1999-2013.

Additional employment

Whole Foods, Prepared Foods Team Member (Apr 2025); Trader Joe’s, Crew Member (Oct 2024-Mar 2025); McGrath Evanston Subaru, Sales Consultant (Jul-Aug 2024); Uber, Independent Contractor (Jan 2023-Sep 2024).

SELECTED PROJECTS

Medium Talk | Vue conversation app built for a public Meetup picnic in Baltimore, helping strangers get to know each other. github.com/nrrb/mediumtalk

Dancefloor Bass Analyzer | React and Rust desktop application for exploring low-frequency characteristics of a DJ music library. In development. github.com/nrrb/music-energy-analyzer

EDUCATION

Northwestern University | Coursework in Mathematics and Computer Science, 1999-2003. Degree not completed.
